**LAPIS** POSA DI UN ANGOLO ESTERNO  
LAYING ON AN EXTERNAL CORNER

**A**

**B**

To cover an external corner, it is possible to use the special “quartino” **(A)** piece, which perfectly connects the tiles laid at 90°. Otherwise, it is also possible to use the “modulo 1” **(B)**, installed directly in the corner of the column to be covered. (We suggest to grout the joint between the “modulo 1” and the other tiles beside it).

# LAPIS POSA DI UN ANGOLO INTERNO

LAYING ON AN INTERNAL CORNER

**A**

**B**

To cover an internal corner, you can use the “modulo 1” **(A)**, starting the laying right from the corner, or you can directly join the edges of the 10x30 cm and the 30x30 cm LAPIS tiles, without using any special piece **(B)**.

<https://www.youtube.com/watch?v=5RsDCsvExdc>

Lapis can also be laid on wood and plywood, using an adhesive suitable for these surfaces. Ideal for covering bar and reception counters.

# LAPIS

PASSION, QUALITY AND TRADITION, THESE ARE OUR INGREDIENTS.

*“**Double- firing**” is the process that still produces Ceramics made with earth dust, double-fired at more than 1000 °C (1832 °F) and glazed with a manual intervention, to give your wall that special natural touch of craftsmanship that other products do not have. This tile, fired twice, is the real Ceramics, understood as a blending of Earth, Glaze and Fire. Some deformations, irregularities, impurities and accumulations of glaze are due to manual intervention and they are to be considered a value, making each piece almost unique. The result is a covering with a natural and original flavour at the same time.*

**COTTO NATURALE**

Matt and porous surface, also called “biscuit”, typical of ceramics after the first firing.

---

**COTTO CERATO**

Matt and porous surface, also called “biscuit”, typical of ceramics after the first firing, on which a layer of wax is applied which makes the original color more intense and tending to reddish. This finish is for aesthetic purposes only and does not alter the characteristics of the product which remains as porous as the unwaxed product.

---

**SILK**

It's an effect of the matt glazed finish, that gives the surface a soft silk touch.

**LACCATO**

Almost mirror-like glossy surface, perfectly smooth and uniform throughout the tile.

---

**BIANCO MAIOLICA**

This finish of the traditional Faenza majolica, used to produce various ceramic objects, so it recalls a nice retro style.

---

**CRAQUELÉ**

It's a particular effect of the superficial glaze, characterized by small cracks that have been caused by the difference of cooling support coefficients and of the glaze. This kind of ceramic effect is unique and always different from tile to tile, the "net of cracks" develops uncontrollably.

**ARGENTO SIDERALE**

Metallic silver-coloured surface similar to the “gunmetal” tone, characterized by being slightly matt, non-reflective.

---

**BRUNO DORATO**

Metallized surface in a burnished gold colour whose characteristic is to have a texture formed by a grid of tone-on-tone veins.

---

**NERO LUSTRATO  
MADREPERLA**

Precious mother-of-pearl surface on a black glossy base. The mother of pearl glaze is applied in 3rd firing and gives iridescence, metamerism and reflection, giving particular and unique chromatic effects. This glaze contains all the colours of the rainbow that are enhanced by refracting the light.
